90 years of Aurora: Innovating together, inspiring and honoring the past

It is with pride and gratitude that we celebrate Aurora's 90th anniversary in 2025. As a Belgian family company founded in 1935, we have succeeded in inspiring generations of writing. This milestone is not only a look back at our rich history, but above all a solid foundation for the future, in which we pursue our vision together with you: to strengthen lifelong learning.

As a strong international player, we have always set the bar high and continue to focus on the office, school and retail markets, each with their own requirements and needs. Obtaining the Ecovadis certificate underlines our commitment to sustainability and aligns with European standards that are increasingly important to you as our partner. In addition, we proactively anticipate the opportunities and obligations within the EUDR legislation (European Deforestation Regulation) and continue to make our offering more sustainable, so that our products and solutions meet the requirements of today and tomorrow.

In recent years, we have focused on strengthening our brand, investing in customer relationships and expanding our sustainable manufacturing capabilities. With an expansion of our product and marketing team, we are focusing on innovative solutions, both customized and in close cooperation with our partners. We also continue to work daily to become a more agile organization.

At Aurora, we want to be more than a supplier: we strive to be your strategic partner in an evolving market. Whether for private label projects or our own brand, our core values - quality, sustainability and cooperation - always remain at the center. Our corporate values - perseverance, entrepreneurship, trust and ethics - shape the framework within which we aim to operate as a family business.

For us, celebrating 90 years of Aurora is not just a celebration, but a promise. A promise to continue to be the partner you can rely on for the next 90 years. Together we make knowledge transferable, do business sustainably and create impact.

With sincere thanks for your trust and cooperation,

Gert Cielen
CEO, Aurora

After the success of the first edition, Aurora launched the second edition of the awareness campaign for Literacy Week 2024. This year, the theme of the campaign was “SOT of writing,” with the “SOT” male becoming the central symbol. Aurora wanted to embrace “writing” in all its forms, from graffiti and poetry to song lyrics. To highlight this versatility, Aurora collaborated with a diverse group of artists and social influencers, aiming to inspire a new generation to express themselves through the power of language and literacy.

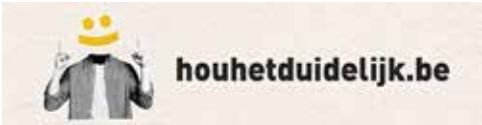

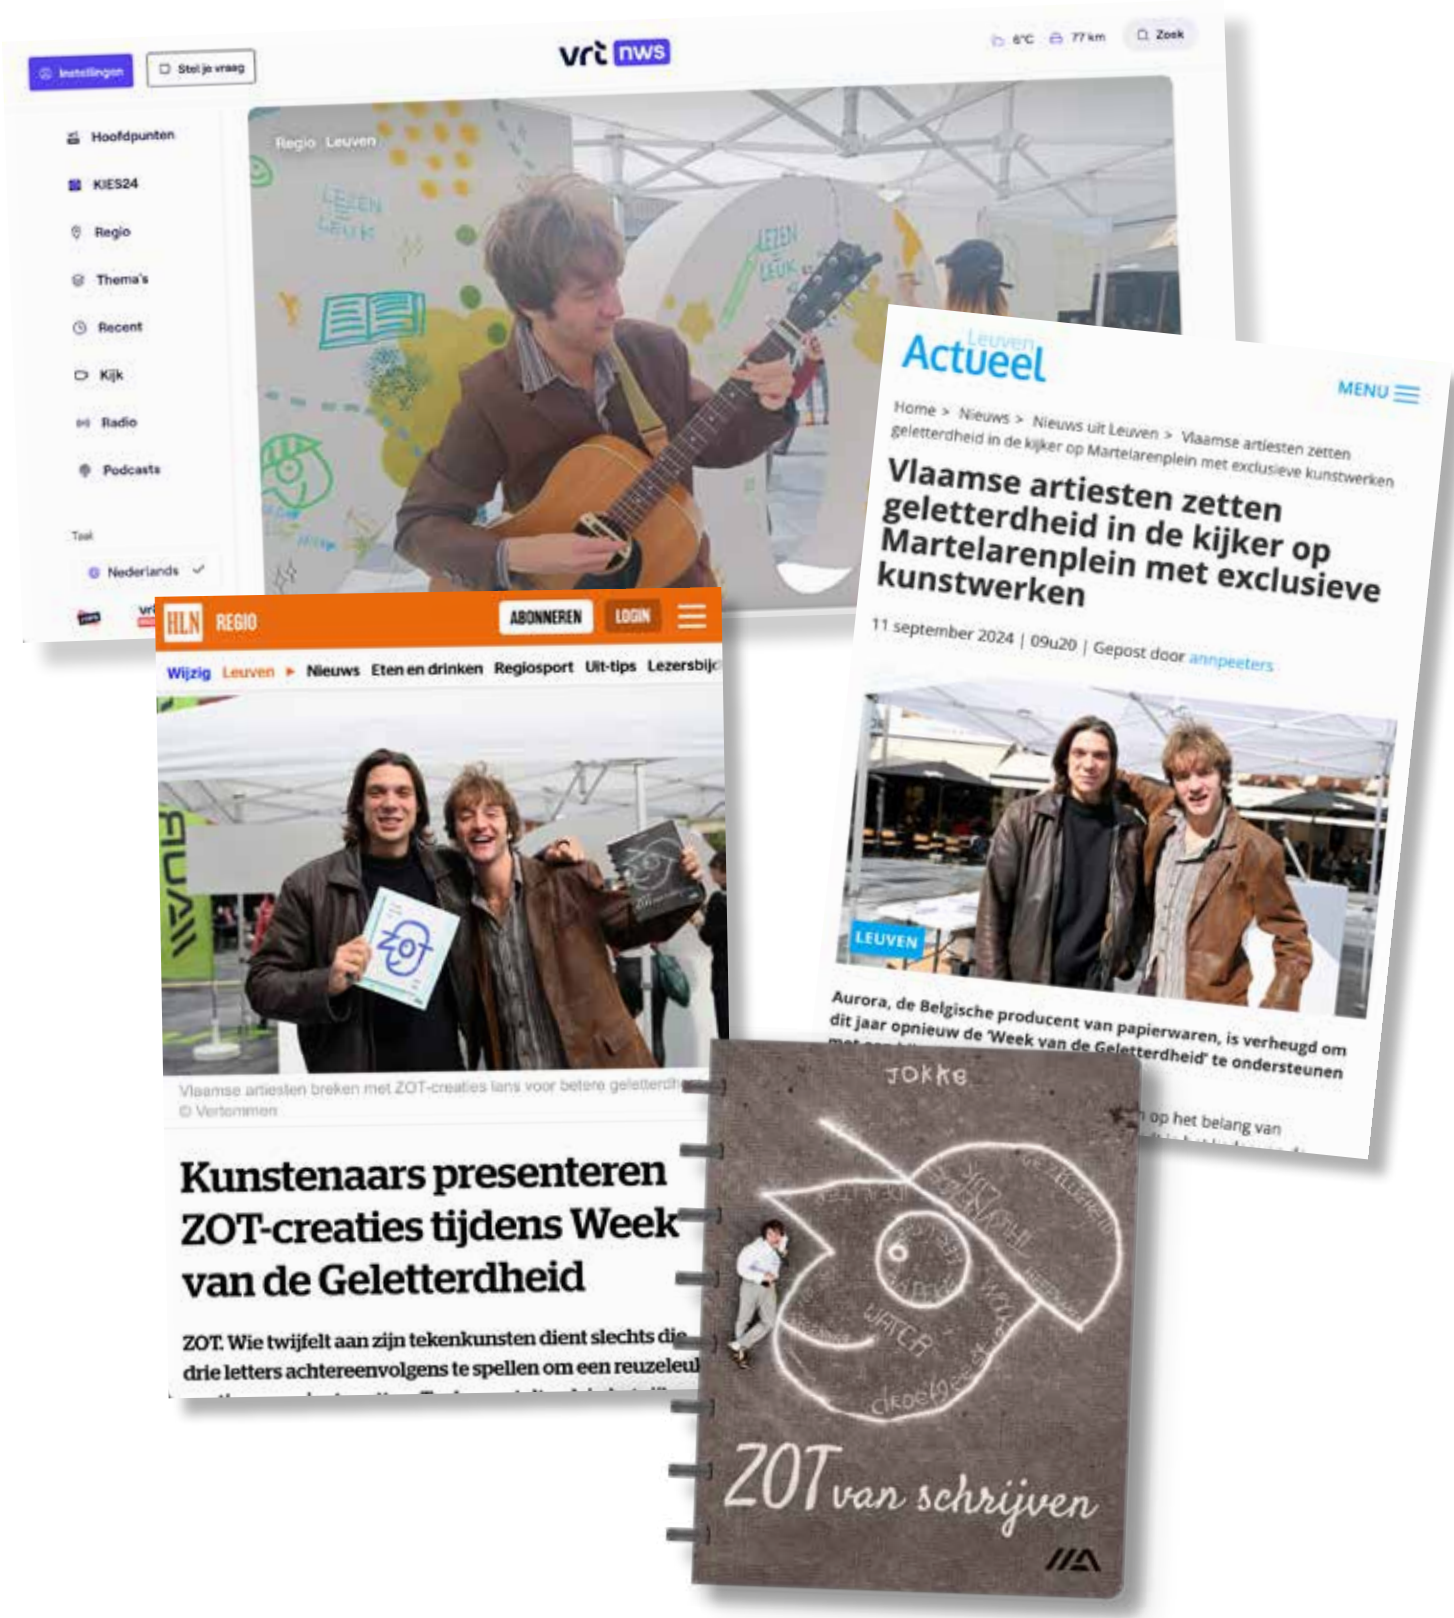

Did you know that 15% of Flemings (16- to 65-year-olds) are insufficiently literate? This was the driving force behind the campaign, in which cartoonist Domien Delforge (Studio Stoutpoep), singer-songwriter Jonas ‘Jokke’ Van Langendonck and actor and word artist Mathieu Carpentier each highlight the importance of literacy in their own unique way.

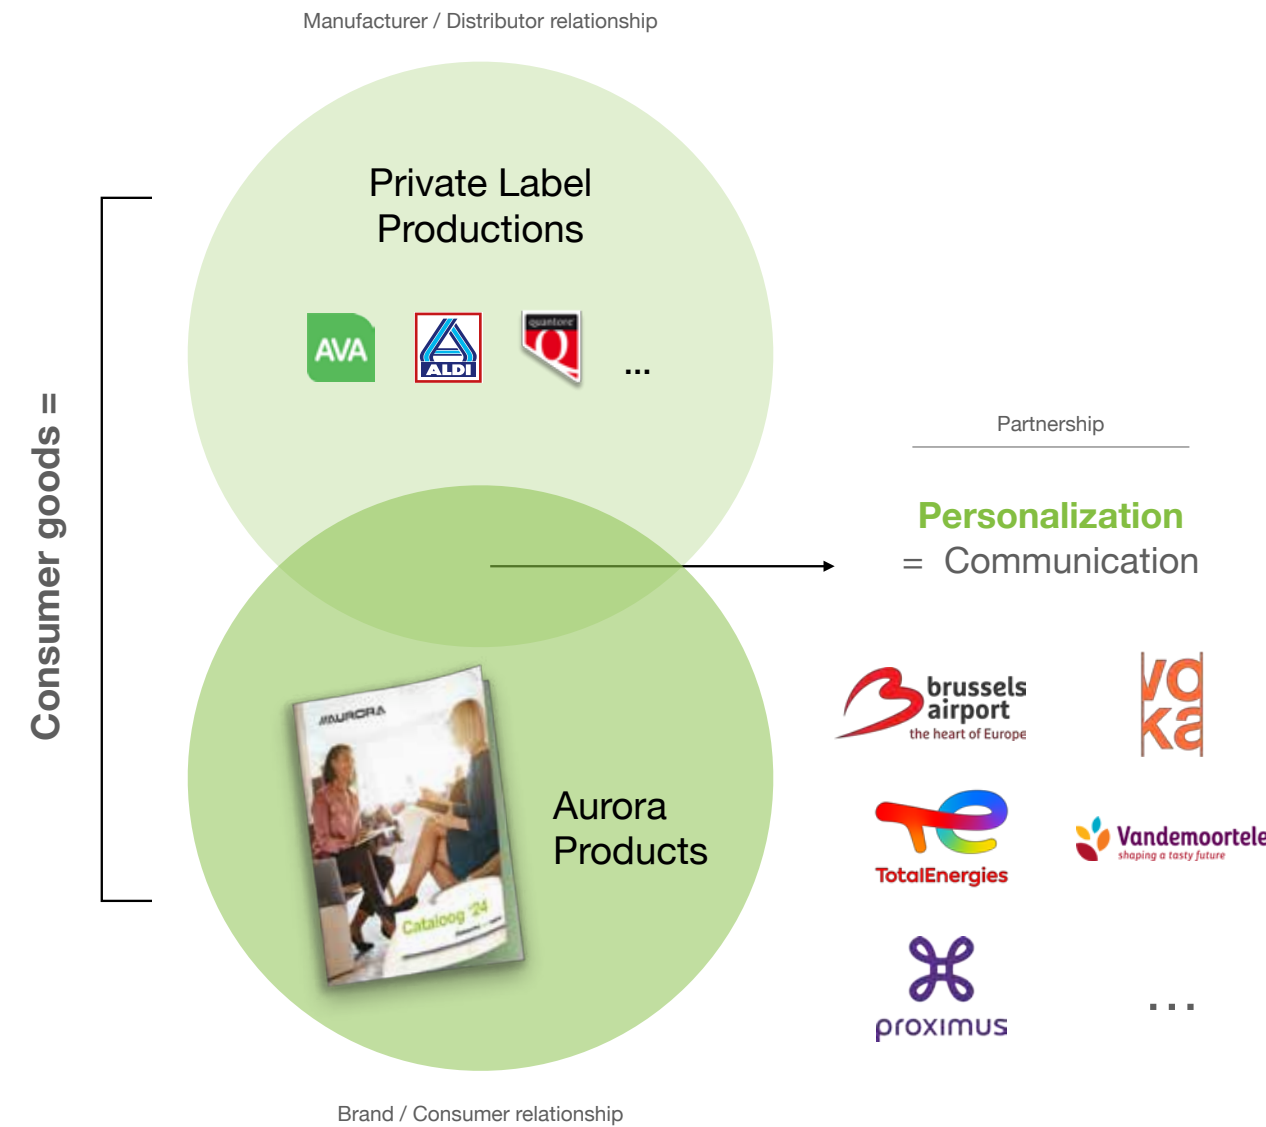

As a producer of notebooks, Aurora offered one of the most accessible solutions to respond to this. We joined forces with Vocvo vzw to do our part locally.

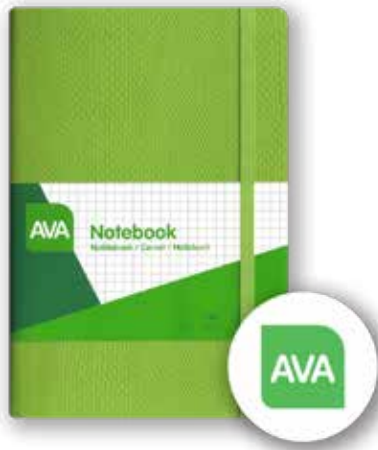

These unique creations and social media campaign, in which each artist highlighted in their own way the power and opportunities of literacy, were exhibited during a temporary happening on the Martelarenplein in Leuven. The public had the chance to admire the works and meet the artists themselves.

With this campaign, we proudly created more awareness of the impact of literacy and increased support for organizations that are making a difference, such as Ligo, Centers for Basic Education.

Thanks to the support of many, we hope to continue building a literate society together!

YOUR BRAND. OUR PASSION!

Your brand, combined with our industry expertise, forms a guaranteed winning combination! Whether it's notebooks, exercise books, memo pads, or practice books... Small, large, thick, or thin, if you can imagine it, we can produce it. After all, you benefit from over 89 years of Stationery expertise, ranging from choosing the right paper type for your project, to the most suitable packaging, storage, and distribution. Our references prove that you've come to the right place with Aurora.

Based on your product preferences, look & feel, and desired price point, we'll work to create the ideal product for your target audience and customers. As an independent producer, we always offer the most cost-effective paper solutions ranging from 90g to 45g and from extra white to recycled paper.

Starting from Aurora's catalog, with over 700 proven references, we provide you with the ideal starting point to kick off your project easily and worry-free. Whether you provide your own design or prefer to work with our design team, our goal is to position your brand as strongly as possible in the market!

After production, you have the choice to have everything delivered to your warehouse at once, or do you prefer to work on call? Our formulas have been specifically developed to meet the needs of the retail and distribution sectors and to optimize your cash flow.

Do you have specific wishes or needs that you would like to discuss with us? Let us know, we are enthusiastically ready to serve your end consumer with the most advantageous solution for your organization.

KEEP our OCEANS CLEAN

Keep our oceans clean

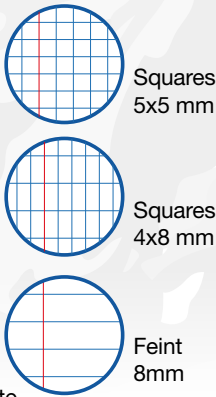

Did you know that an estimated 64 million kilos of plastic fishing nets disappear into our oceans every year? They don't break down, but stay there for centuries. Fish, seals, dolphins and turtles get caught in them. This can and should be changed, don't you think? That is why the cover of this notebook is made from broken fishing nets and old fishing lines. We collect this waste together with the fishing industry and recycle it into new covers. This way, these fishing nets no longer end up in the sea and we also emit less CO2. Together, we keep our oceans clean!

Pssst, these notebooks have been used before...

What do you mean, used? Yes, this finely woven cover consists of plastic waste fished up and recycled by local fishermen. Washed, shredded and woven into 'linen' by them. Thus, 100 notebooks reuse as many as 70 plastic bottles that were otherwise left floating around uselessly. And for hundreds of years. But together with your help, we are slowly but surely giving the seas and oceans back to their inhabitants.

Furthermore, we went in search of the right paper. Made from 100% recycled material and with the smallest ecological footprint. By the way, did you know that your notebook is produced in the Benelux? So it does not travel unnecessary kilometres. And that in turn has a positive impact on the climate. This is how we try to make a difference with Aurora. One notebook at a time with your help, for which we thank you.
